

IAIABC Data Project Update

Background

The CFO Committee decided in May 2016 that AWCBC will provide Canadian published KSMs to IAIABC as requested to form part of their “Claims Measures Survey” package.

IAIABC Claims Measures Survey Results

See attached latest version of IAIABC’s Claims Survey Results.

IAIABC will be sending their survey out once more to see if they can get additional jurisdictions and additional measures from those with partial submissions and hope to publish later this year.

April, 2017 IAIABC Research and Standards Committee Meeting

At the April 2017 meeting of the IAIABC Research and Standards Committee, it was requested that AWCBC see if Canadian jurisdictions would be willing to provide two measures included in IAIABC that are not part of the KSM package:

- **Workplace Fatality Rate for 2013 (per 100,000 covered employees)**
- **Count of Lost Time Claims Denied with an Injury Date in 2013**

TO BE DETERMINED:

Is there appetite to provide Fatality Rate and LTCs Denied to IAIABC to include as part of their Claims Measures Survey?
