

AWCBC All Committees Meeting
National Work Injury Statistics (NWISP) Committee
Data Submission and Analytics Subcommittee (DSAC)

Agenda Items

1. Standards and Conversion tables

Issue: This was the first year we published NWISP statistics using NAICS 2017 and NOC 2011. Jurisdictions did not have to update their reporting but had the option to do so.

Resolve: To discuss next steps for this process (next standards update) and get feedback from members regarding challenges or successes they have observed as a result of this transition.

2. NWISP QuickStats (placeholder)

Issue: Jilal has been working on a NWISP Quickstats project. He may have information to share by the time of the meeting

Resolve: To have Jilal present a status update on this project if one is available at the time of the meeting

3. Novel Statistics and measures

Issue: Jurisdictions have developed various internally reported operating and financial statistics/measures that other jurisdictions may not be aware of but would find valuable.

Resolve: To use any remaining time in our meeting for a roundtable discussion of tools, techniques, measures, and statistics that we are using that may be of interest to other committee members.
