

NWISP 2019 Work Plan Highlights

1. Code Cleanup

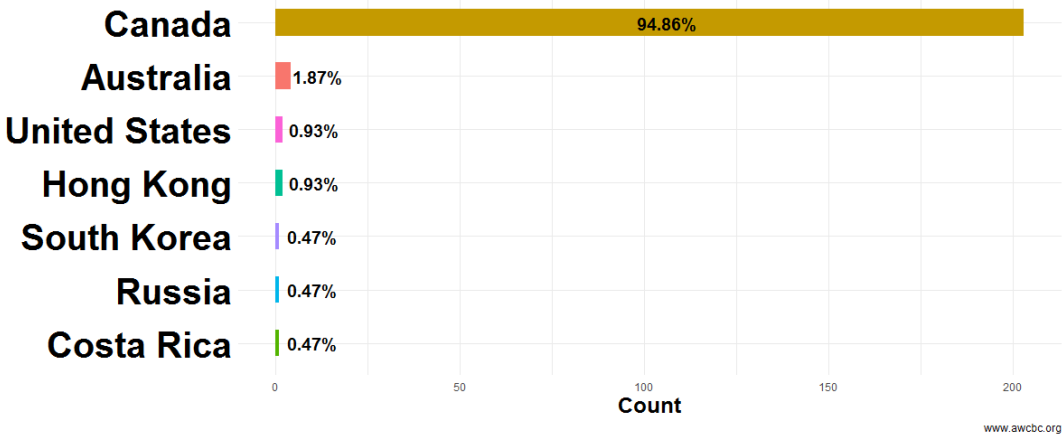

Reviewed codes that had not been used in the prior 10 years and/or used sparingly. Diane provided an overview of the codes and shared that with the CTC – the committee is finalizing their review over the next few months as the list was quite extensive and understanding the implications of cleaning up the code needed further analysis.

2. Publication Timing

Jilal prepared a summary of how our jurisdictions report their NWISP data – this is the background information we needed so we can decide in 2020 how we can proceed with sharing “quicker information at different intervals throughout the year.

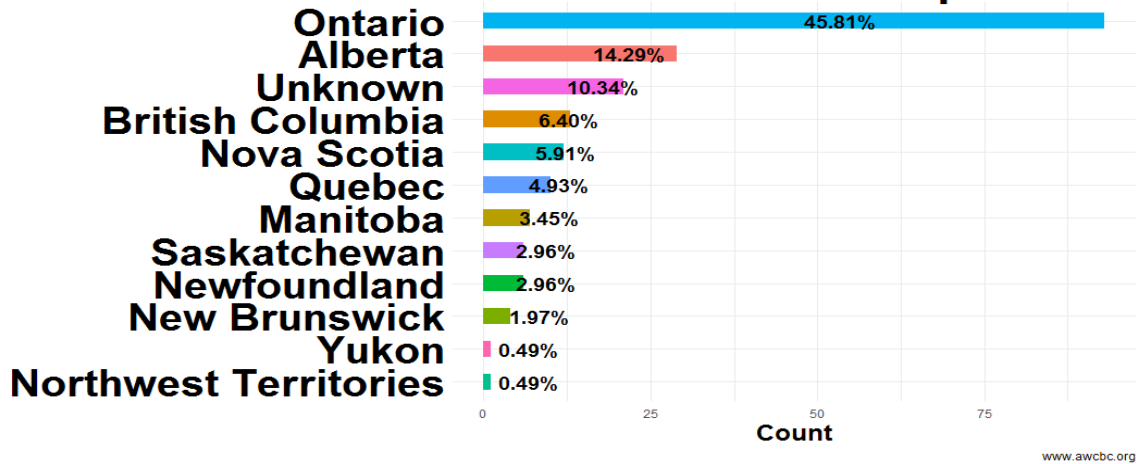

Country of Requester

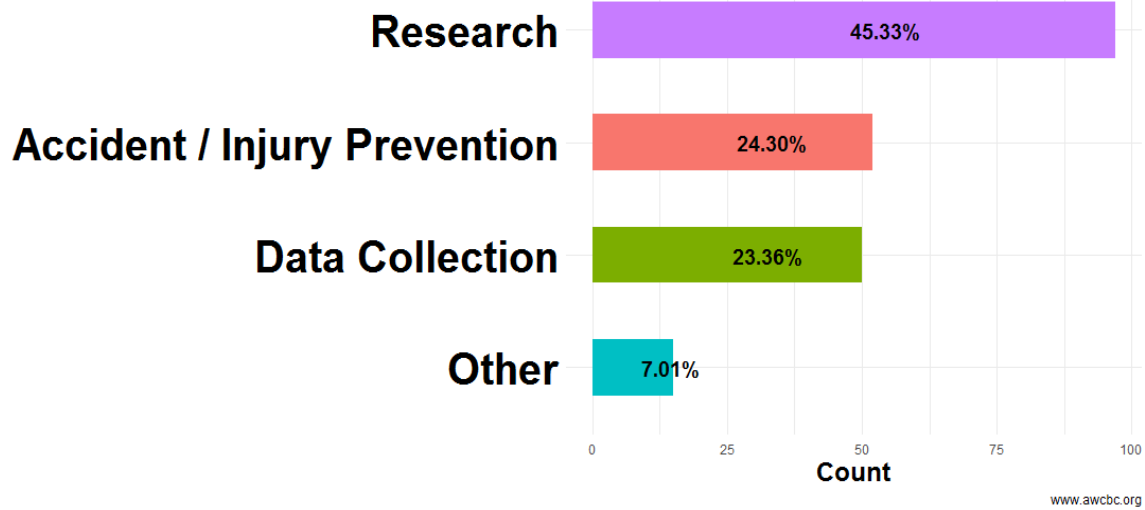

About 95% of the data requests come from Canada and about 46% of the Canadian requests come from Ontario.

Province of Requester

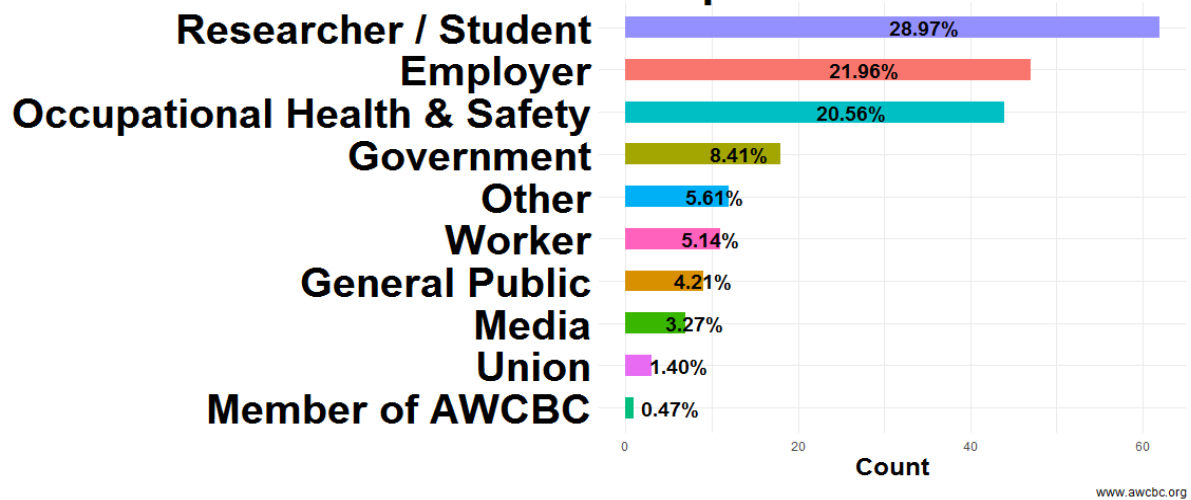

Purpose of Request

About 70% of the data requests are for “research” and “accident or injury prevention” purpose.

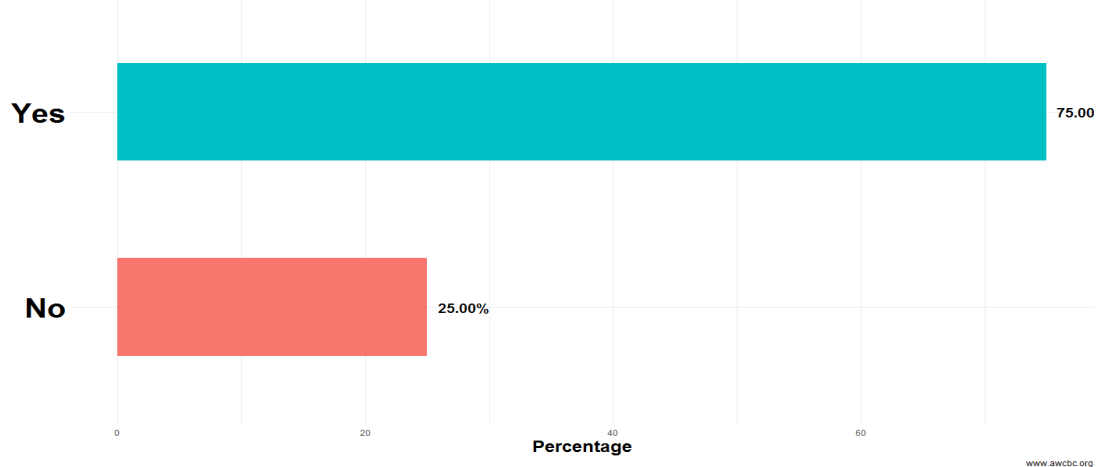

Requesters of Data

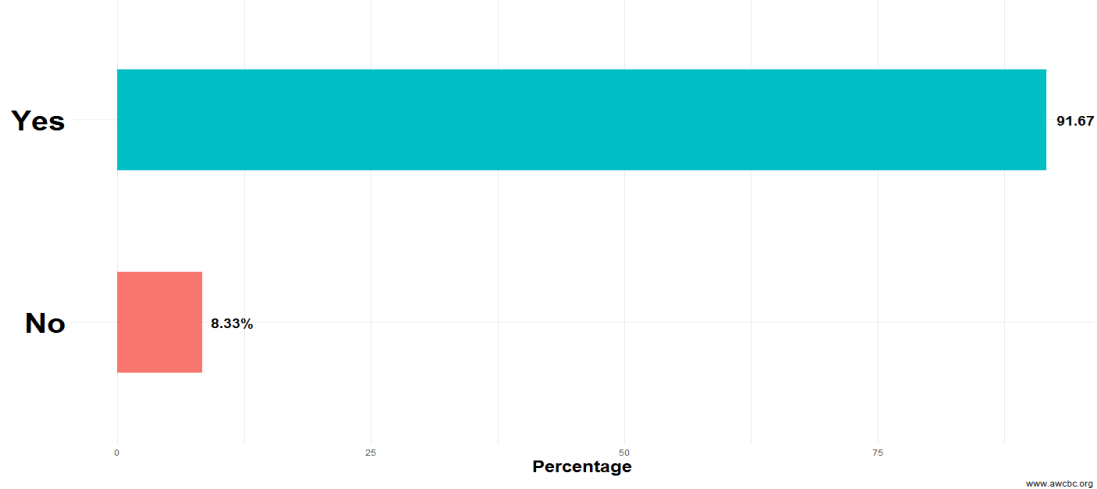

3. NWISP Survey Results

Here is the result of the survey we send out with the requested data. Some data requesters would be interested on “incident rates” for industry in addition to counts.

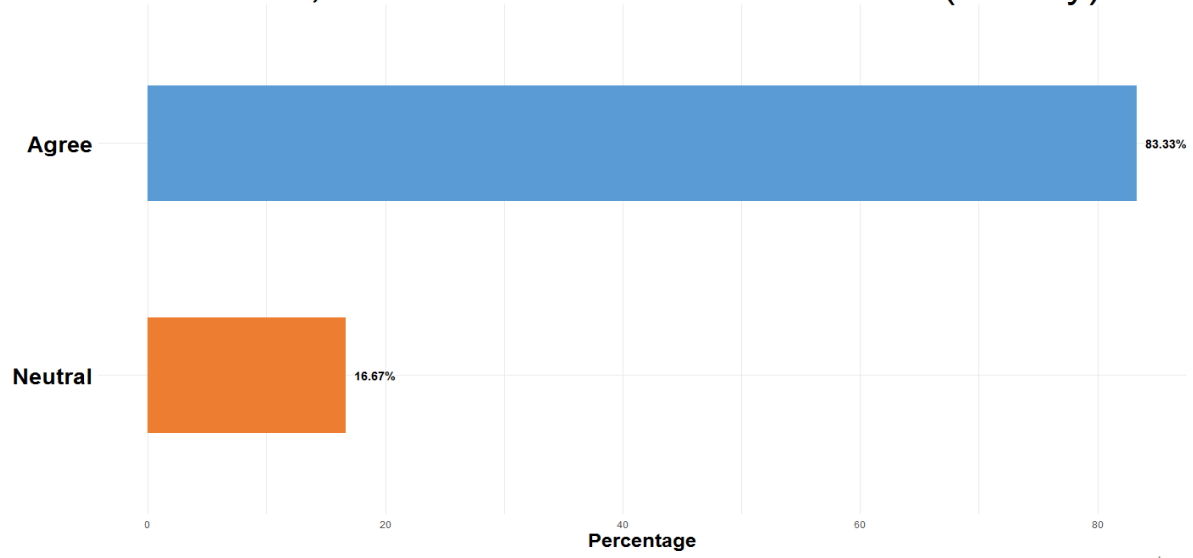

The data I received met my needs(survey):

The data provided was easy to understand(survey):

Overall, I was satisfied with this service(survey):
